Coffee & Vending Systems Division

Zensia

The automatic Barista arrives for vending

AZKOYEN®

Conceived to increase your profits

Zensia, a vending machine that elaborates coffee as a barista.

Customixer function: fidelize consumer and increase your profits

Consumers have become extremely exigent. They require a service more personalized and adjusted to their needs, and they are prepared to pay an extra for it. The Azkoyen Customixer function allows that each service can be graduated by the consumer in terms of quantity of coffee, milk and sugar desired thanks to the potential of the new VPTT Vending Performance grinder and to the flexibility of the Azk V10 espresso Group.

- Increase the average selection price or reduce the cost with the new preselections "Extra shot of coffee" and "light coffee".
- Increase the sales per machine with the Customixer function that allows the consumer to personalize the service.

Attractive and customisable: the centre of attention

The attractive design of Zensia aims to grab the attention of potential consumers to increase the number of services per machine, particularly at public vending points. The design is minimalist, ergonomic and intuitive.

- **Exclusive back-lit touch keypad** with screen effect.
- **Customizable:** front and decals.
- **Digital Signage Ready:** Ready to incorporate screens to 15,4" Full HD to offer users audiovisual information and advertising.

Increase your profit margins. Two is better than one

Zensia Double Espresso has two coffee bean hoppers and two grinders.

- Offer **one type of coffee selection** and a **second premium quality** for higher priced selections.

Up to 88% more autonomy

Autonomy is a key factor in the profitability of a vending service business. The equipment has been designed to provide real autonomy equivalent to the number of cups by optimizing coffee, milk and chocolate capacity in specific models. This autonomy allows the reduction of operational costs in maintenance and product refilling per machine.

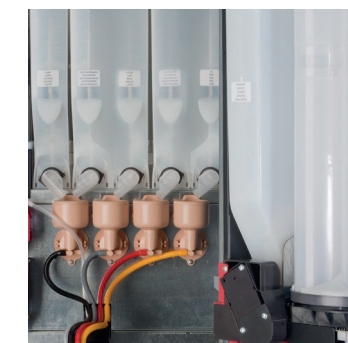

- Save up to 33% of costs in each operations route.

Reduce operational costs. Making your work easier is our main aim

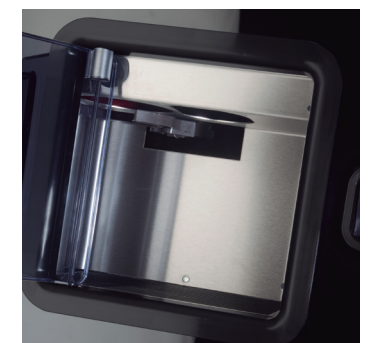

Installation and programming extremely straightforward:

- Pre-installed profiles.
- 20 programmable buttons.
- Standard USB connectivity.
- Standard EVA-DTS communications module.
- Master&Slave connection with Mistral+.

Easy maintenance and product replacement:

- Product refilling without taking the canisters off.
- Flat surfaces for easy cleaning.
- Soluble system designed to avoid any incidence and product blockage.
- Programmable filter change alerts system.

Security and antivandalism:

- Acrylic glass front with rear reinforcement in galvanized steel.
- More secure Cup Station constructed from stainless steel.
- Lower part of the door with a reinforced metal panel.

Environmentally friendly

Zensia has been developed under the 3R rule: Reduce, reuse, recycle.

- **Reduce:** We have reduced energy consumption as far as possible, obtaining A+ energy efficiency certification.
- **Reuse:** Designed for conditioning, which lengthens the useful life.
- **Recycle:** Made according to RoHS and WEEE European directives.
